

# Germ Stoppers

Germ stoppers are superheroes.

Germ stoppers wash their hands.

Germ stoppers wear masks.

Germ stoppers try to stay home as much as possible while there is an icky virus.

But even germ stoppers must leave their home or see new people.

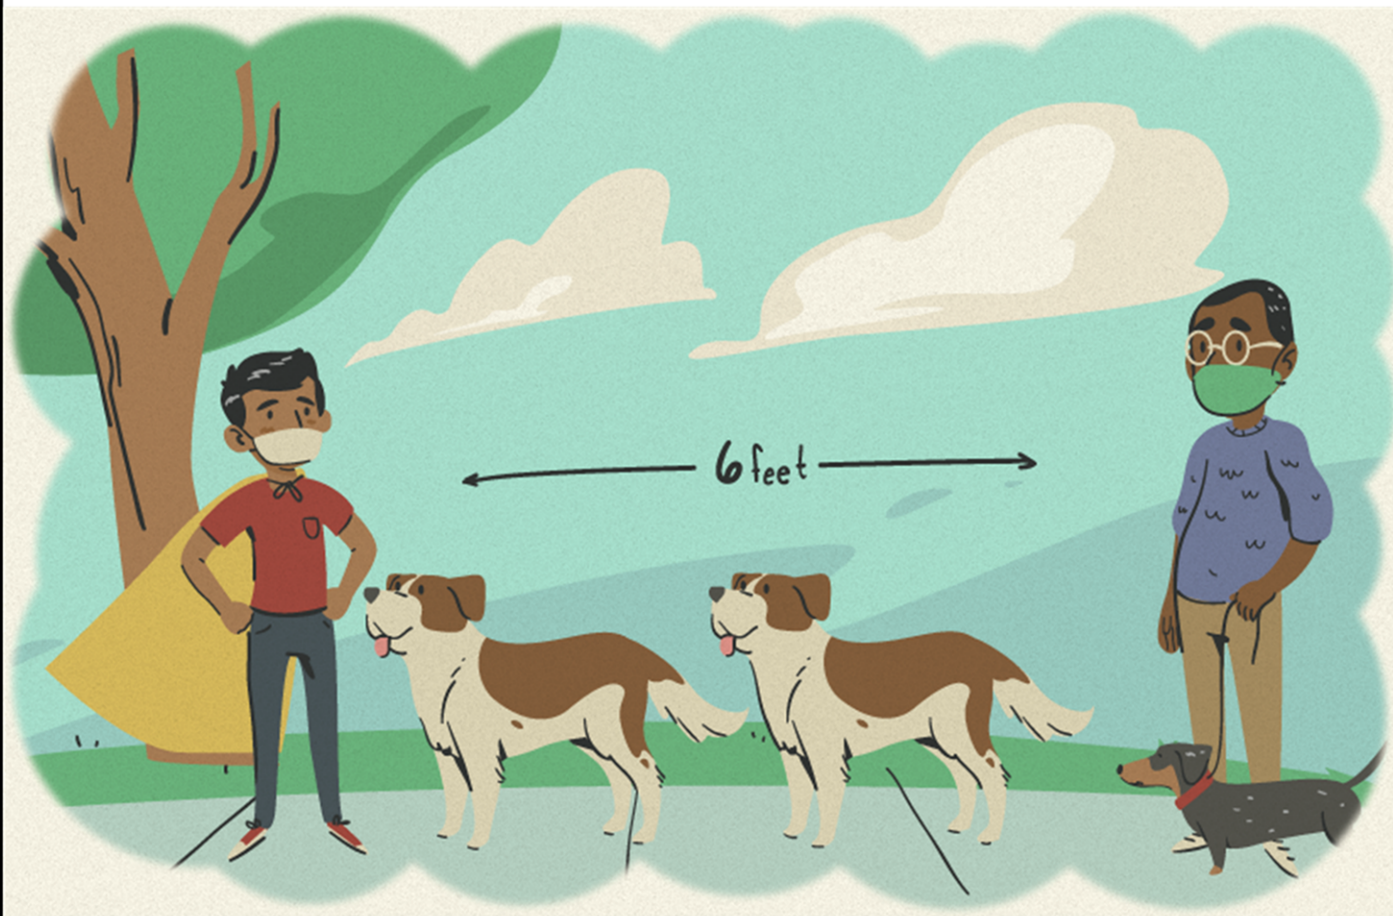

When they do, they keep a safe distance from other people.

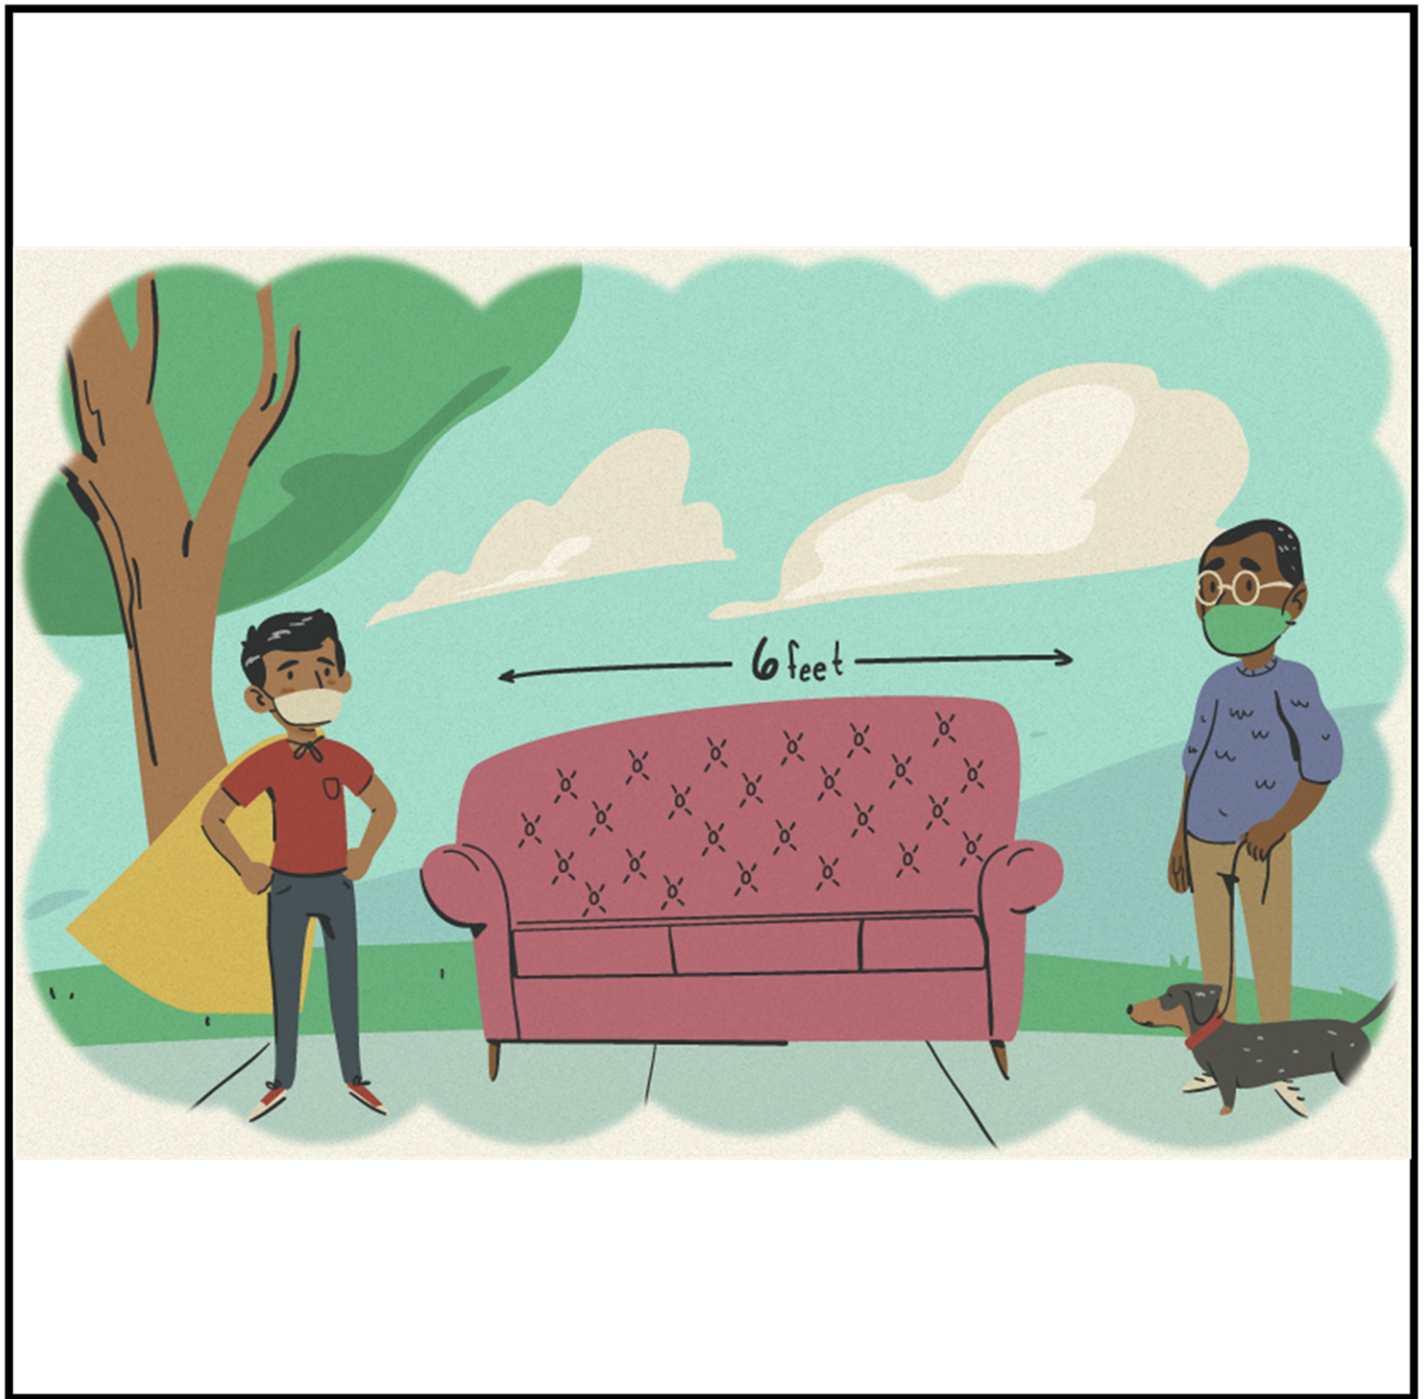

They know how far to stay back  
because they use their imagination.

They imagine two big dogs in a row.

Or the length of their sofa or bed.

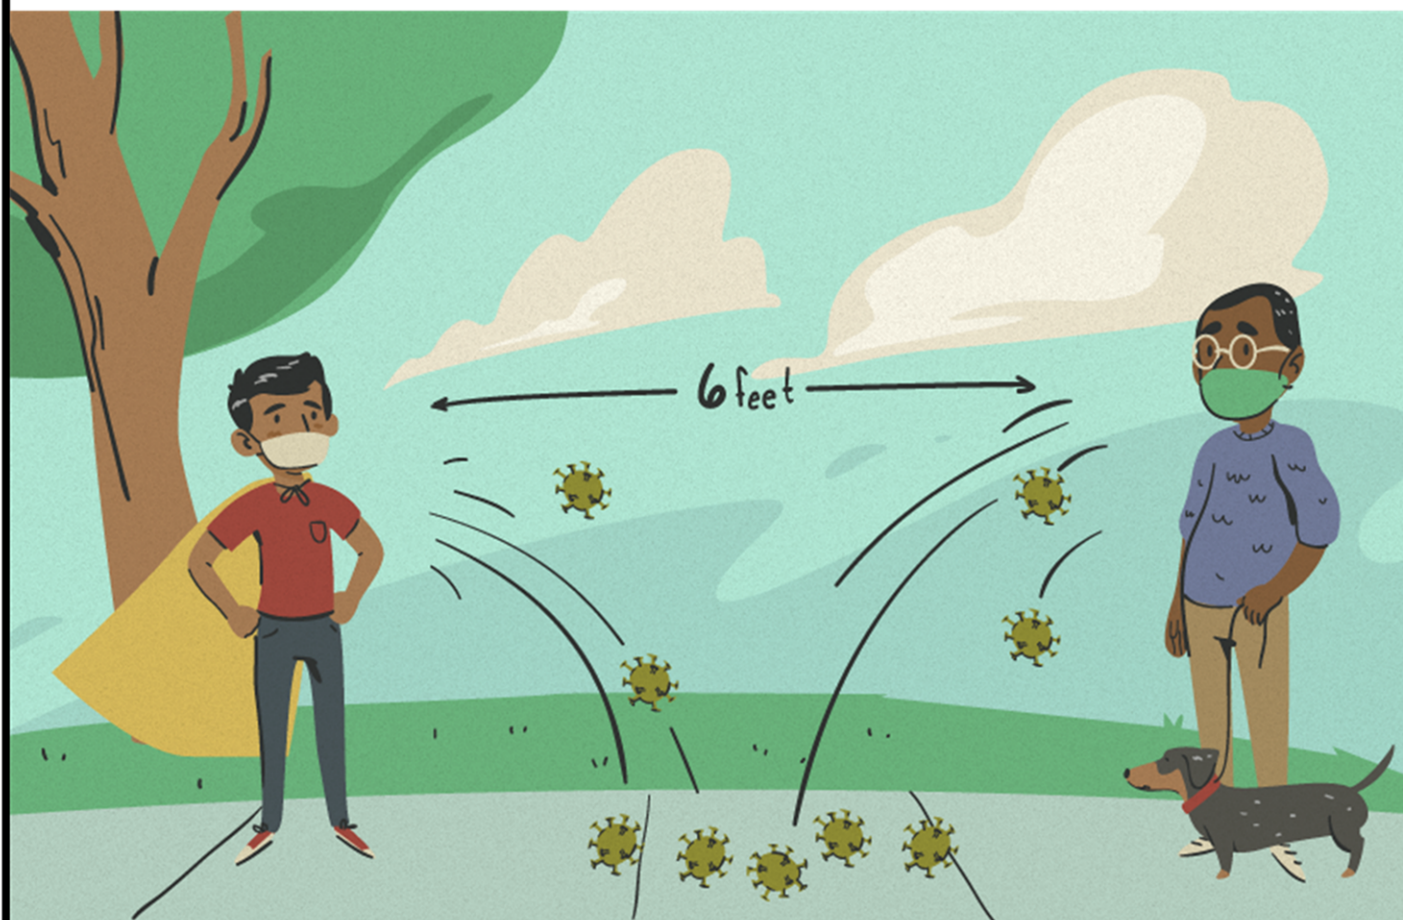

Or three empty desks.

Or a grown-up lying flat on the ground.

This amount of space helps stops germs from spreading.

Germ stoppers want to stay healthy  
and keep others healthy.

You can be a germ stopper today!
